Response to Office Action Dated 02/04/05

Application No. 09/868,694  
Attorney Docket No. 05222.00153

**IN THE CLAIMS:**

1. (Currently Amended) A method for creating a presentation on a computer system, comprising the steps of:
  - (a) receiving indicia representative of a goal and presenting the goal on a display;
  - (b) integrating examples into the presentation to provide assistance with achieving the goal;
  - (c) monitoring progress of a student toward the goal and providing feedback that further assists the student in accomplishing the goal; and
  - (d) providing a dynamic toolbar on the display to assist the student with achieving the goal, the dynamic toolbar being configurable for the presentation.
2. (Previously Presented) The method for creating the presentation as recited in claim 1, wherein the dynamic toolbar is instantiated from information in a database.
3. (Previously Presented) The method for creating the presentation as recited in claim 1, wherein credit processing material is integrated into the presentation.
4. (Previously Presented) The method for creating the presentation as recited in claim 1, wherein the dynamic toolbar contains utilities that are integrated into the presentation.
5. (Currently Amended) The method for creating the presentation as recited in claim 1, wherein the dynamic toolbar is instantiated by a message from the presentation to a database object containing information indicative of a ~~the~~ current status of the presentation.
6. (Previously Presented) The method for creating the presentation as recited in claim 1, wherein the dynamic toolbar contains polymorphic logic that is dynamically instantiated based on characteristics of the presentation when the toolbar is instantiated.
7. (Previously Presented) The method for creating the presentation as recited in claim 1, wherein the dynamic toolbar includes linkages to an Internet.

Attorney Docket No. 05222.00153

8. (Previously Presented) The method for creating the presentation as recited in claim 1, wherein the dynamic toolbar includes an interface to perform electronic mail management.
9. (Previously Presented) The method for creating the presentation as recited in claim 1, wherein the dynamic toolbar includes an interface that supports telephony functions from the presentation.
10. (Currently Amended) An apparatus that creates a presentation, comprising:
  - (a) a processor;
  - (b) a memory that stores information under control of the processor;
  - (c) logic that integrates examples into the presentation to provide assistance with achieving the goal;
  - (d) logic that monitors progress of a student toward the goal and provides feedback that further provides the student assistance in accomplishing the goal; and
  - (e) logic that presents a dynamic toolbar on the display to assist the student with achieving the goal, the dynamic toolbar being configurable for the presentation.
11. (Previously Presented) The apparatus that creates the presentation as recited in claim 10, wherein the dynamic toolbar is instantiated from information in a database.
12. (Previously Presented) The apparatus that creates the presentation as recited in claim 10, wherein the dynamic toolbar is context-sensitive to the presentation.
13. (Previously Presented) The apparatus that creates the presentation as recited in claim 10, wherein the dynamic toolbar contains utilities that are integrated into the presentation.
14. (Previously Presented) The apparatus that creates the presentation as recited in claim 10, wherein the dynamic toolbar is instantiated by a message from the presentation to a database object containing information indicative of a current status of the presentation.

Attorney Docket No. 05222.00153

15. (Previously Presented) The apparatus that creates the presentation as recited in claim 10, wherein the dynamic toolbar contains polymorphic logic that is dynamically instantiated based on characteristics of the presentation when the toolbar is instantiated.
16. (Previously Presented) The apparatus that creates the presentation as recited in claim 10, wherein the dynamic toolbar includes linkages to an Internet.
17. (Previously Presented) The apparatus that creates the presentation as recited in claim 10, wherein the dynamic toolbar includes an interface to perform electronic mail management.
18. (Previously Presented) The apparatus that creates the presentation as recited in claim 10, wherein the dynamic toolbar includes an interface that supports telephony functions from the presentation.
